ADIL SHABAB
Full Stack Developer

I am an adept web developer with two years of professional experience, currently advancing my technical expertise while pursuing a Bachelor of Computer Applications (BCA) at Indira Gandhi National Open University (IGNOU). My skill set encompasses HTML, CSS, JavaScript, React, React Native, Python, Django, SQL, and other modern frameworks and libraries.

I am passionate about designing and developing user-centric digital solutions that are both intuitive and impactful, consistently striving to merge functionality with aesthetic appeal.

Experience

● Full Stack Developer

Mentegoz Technologies Pvt Ltd   2022 Aug - 2023 May

At Mentegoz Technologies, I have honed my skills as a Full Stack Developer, working extensively with a diverse tech stack that includes Python, Django, HTML, CSS, and React JS. My role involved building and maintaining web applications that are both scalable and efficient, addressing the full spectrum of development from back-end logic to front-end user interfaces.

● Javascript Developer

Funtastic Sports Pvt Ltd   2023 June - 2024 June

At Funtastic Sports Pvt Ltd, a product-based company, I utilized React for web development and React Native for mobile applications. My key project was developing an admin panel, streamlining backend processes and providing robust analytics. This role enabled me to enhance interactive application features, catering to both web and mobile platforms.

● Full Stack Developer

ThinkB Creative Agency   June 2024 - Present

As a Full Stack Developer at ThinkB Creative Agency, I contributed to the development and deployment of hospital management systems and project management software, delivering scalable and efficient solutions. My role involved integrating advanced features, utilizing a wide range of libraries for functionalities such as video calling, SMS services, and payment gateways (including PhonePe, Razorpay, and HDFC).

Service Integration

I integrated SMS and OTP functionalities, as well as payment gateways like Razorpay, PhonePe, and HDFC, along with Zego Cloud for video calling solutions.
